

Publish and Read

The author's journey for fee-free
open access

What to expect

Default OA under a Publish and Read agreement is administratively simple for authors with a light-touch through manuscript processing. All authors benefit from:

- ❖ Unlimited OA publishing in the Society's six journals
- ❖ Unlimited access to all content on our publishing platform microbiologyresearch.org

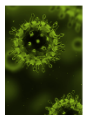

Eligible journals

MICROBIOLOGY

microbiologyresearch.org

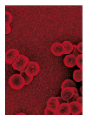

#MicrobioJ

JOURNAL OF GENERAL VIROLOGY

microbiologyresearch.org

#JGenViroJ

JOURNAL OF MEDICAL MICROBIOLOGY

microbiologyresearch.org

#JMedMicro

MICROBIAL GENOMICS

microbiologyresearch.org

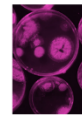

#MGen

INTERNATIONAL JOURNAL OF SYSTEMATIC AND EVOLUTIONARY MICROBIOLOGY

microbiologyresearch.org

#IJSEM

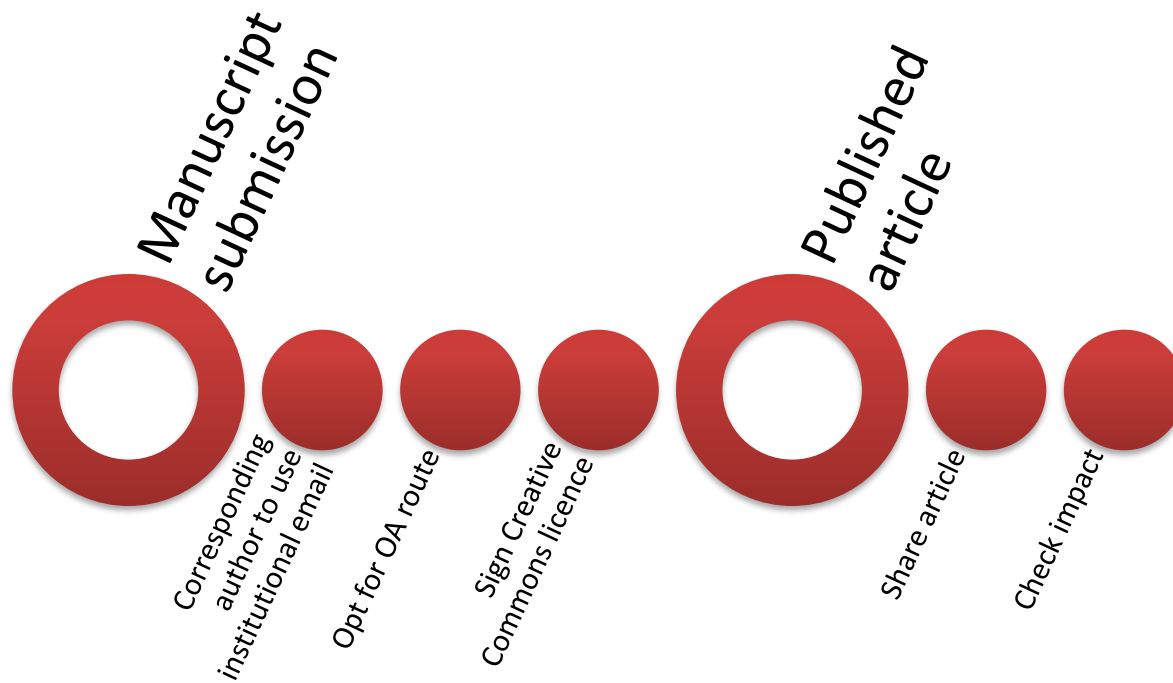

ACCESS MICROBIOLOGY

microbiologyresearch.org

#AccessMicro

The Author Journey

Manuscript Submission

Article submission is a straightforward process using Editorial Manager, our manuscript submission and peer review system. Before starting the submission process, authors need only to know that

- *Corresponding* authors must be affiliated with a Publish and Read institution in order to be eligible for fee free OA publishing
- The corresponding author's *institutional* email address will be used to verify eligibility for **Publish and Read**. A subdomain can also be used, e.g. @(xxx)york.ac.uk.
- Authors will be required to sign a Creative Commons licence when submitting a revised manuscript during peer review.

JOURNAL OF GENERAL VIROLOGY Volume 101, Issue 8

Review Article | Open Access

The dynamics of humoral immune responses following SARS-CoV-2 infection and the potential for reinfection

Paul Kellam^{1,2}, Wendy Barclay¹

ABSTRACT

We Recommend

Middle East respiratory syndrome coronavirus shows poor replication but significant induction of antiviral responses in human monocyte-derived macrophages and dendritic cells
Janne Tynell et al., J Gen Virol, 2016

F4b-encoded accessory proteins of Middle East respiratory syndrome coronavirus and related bat coronaviruses localize to macrophages and inhibit innate immune responses

Oxygen and viruses: a breathing story

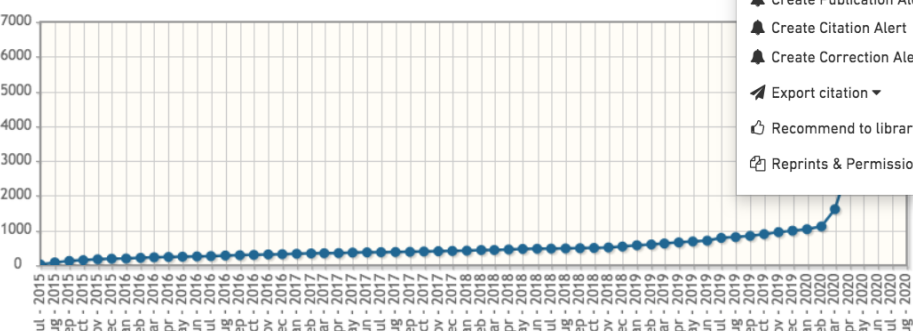

Frédéric Morinet¹, Mathilde Parent², Corinne Bergeron³, Sylvie Pillet⁴, Claude Capron²
